 2008 County Population is estimated at this date.

**Official Enrollment** - Number of students for which CDE calculates fundin; also referred to as the Funded Pupil Count. This is the number Jeffco has historically used for reporting and does not count all PK children.

**Membership Count** - number of students actively enrolled and attending in grades PK-12 during the October Count window. Is typically slightly higher than the One Day Count (Official Count) due to funding by CDE (majority are 1/2 number of PK)

In 2001 CDE and the State Legislature began requesting that Districts report all PK students whether funded or not, which caused the change from the One Day Official number to the Membership number.
