Parents of gifted children need access to a variety of resources, networking and support to help guide them through their child's academic journey. The GT Department will be offering, in conjunction with JAGC (Jefferson County Association for Gifted Children) GT Parenting Seminars. The presentations are prepared by various professionals on issues related to gifted children. The Parent Seminars focus on supporting the children, parents and educators while offering the resources and networking that are needed.

NOTE:

- * Parents and Staff do not need to RSVP
- * Babysitting is not provided; although we encourage age— appropriate attendance
- * Information will be posted after the seminar on Jeffco GT website
