* Beginning with the 2017-2018 school year, a significant change was made to the calculation of mobility rates. The mobility rate calculations no longer include student movements occurring at the beginning of the school year up to the October Count date; only student movements occurring after the October Count date are included in the mobility rates. This change has resulted in significant decreases for some schools and at the district level.

Definitions for the Mobility Rates:

The Student Mobility Rate (unduplicated) “is the proportion of students having moved during the school year. The student mobility rate measures the number of students who have moved (a count of one regardless of the number of times a student moves). The rate includes an unduplicated count of students who transfer into the school or district or out of the school or district during the regular school year.” (1)

The Occurrence Mobility Rate (duplicated) “is the frequency with which student moves occur during the school year. The occurrence mobility rate measures the number of moves made by students (a count equal to the number of times a student has moved). The rate includes a duplicated count of students who transfer into the school or district, out of the school or district, or both into and out of the school or district during the regular school year.” (1)
